

At CE3 Group, we are committed to providing comprehensive Environmental and Engineering Services to help our clients navigate the complex world of environmental regulations, ensure compliance, and minimize their environmental impact. We configure teams to meet specific project and client needs. Here are some examples of what services our teams can provide.

1

Environmental Regulatory Compliance Consulting

Our comprehensive consulting services help public and private sector clients navigate environmental regulations, ensure compliance, streamline permitting, and develop strategies to minimize environmental impact and maximize organizational objectives.

2

Environmental Compliance Assurance

We offer assessments, audits, and ongoing monitoring to identify and rectify compliance issues, reducing environmental risk and liability.

3

Project Management for Environmental Assignments

Our experienced project managers oversee and coordinate all aspects of your environmental projects, ensuring efficiency and compliance.

4

Permitting and Government Approvals

We streamline permit applications and approvals to meet all necessary requirements for your projects.

5

Environmental Monitoring and Assessment

Our data-driven approach allows you to make informed decisions and adapt strategies for effective environmental programs.

Hazardous Materials and Designated Substances Services

We provide specialized services in managing hazardous materials and designated substances, including surveys, sampling, reporting, and mitigation strategies.

6

Asbestos Management and Consultation

Our expertise in asbestos management includes surveys, lab analysis, reporting, and mitigation solutions.

7

Environmental Impact Assessment

We conduct thorough assessments to identify and mitigate adverse environmental effects, helping you meet regulatory requirements and minimize harm.

8

Environmental Regulatory Compliance Training

We conduct thorough assessments to identify and mitigate adverse environmental effects, helping you meet regulatory requirements and minimize harm.

9

ISO 14001 Management Systems Support

Our team supports implementing, maintaining, and optimizing ISO 14001-conforming management systems, demonstrating your commitment to environmental responsibility and sustainability.
